

# VX 500

## The compact 3D printer

The VX500 models are proven 3D printing systems suited for a large number of application scenarios. These machines can be found wherever there is a demand for the straightforward production of prototypes and functional models. Despite their compact dimensions, they captivate with the features of high-performance printers, such as multi-jet print heads,

integrated material handling and exchangeable containers. The VX500 can achieve very high building speeds, with high definition version resolution. The surface quality of the components meets sophisticated requirement profiles.

## Technical data

### DIMENSIONS AND WEIGHTS

Dimensions LxWxH	1.750 x 1.850 x 1.100 mm
Installation space	8.000 x 6.500 x 2.800 mm
Weight	1.200 kg

### PROCESS

Build space LxWxH	500 x 400 x 300 mm
Print resolution x, y	up to 600 dpi
Layer thickness	150 µm

\*Installation space incl. peripherals

## System features

- Compact entry into industrial 3D printing
- Right choice for the rapid and economical production of prototypes and small series
- Multi-jet print head
- Resolution of up to 600 dpi
- Effective and continuous operation through rugged design and high quality components
- Unprinted particle material is recyclable

The Equipment (including any use of the Equipment), is subject to proprietary processes. Other uses of the Equipment than those specified by voxeljet may expose the user to liability for patent infringement.
